DECISION ACCORDING STATUS  
 UNDER 37 CFR 1.47(a) AND  
 REQUIREMENT OF  
 SUPPLEMENTAL DECLARATION

This is in response to the "Request for Reconsideration" filed March 9, 1998.

The petition is granted.

Petitioner has now supplied an acceptable declaration under 37 CFR 1.64.

The above-identified application and papers have been reviewed and found in compliance with 37 CFR 1.47(a). This application is hereby accorded Rule 1.47(a) status.

However, it is noted that the declaration contains a typographical error in the post office and residence address of the non-signing inventor (Liechtenstein is missing a "c"). Accordingly, a supplemental declaration is required, correcting the typographical error, before issuance of the application as a patent or any earlier time required by the examiner.

As provided in Rule 1.47(a), this Office will forward notice of this application's filing to the non-signing inventor at the address given in the Declaration. Notice of the filing of this application will also be published in the Official Gazette.

The Power of Assignee, filed January 5, 1998, is considered proper for an application filed under 37 CFR 1.47(a).

After mailing this decision, the above-identified application will be forwarded to Group Art Unit 2505 for further processing.

Telephone inquiries regarding this decision should be directed to the undersigned at (703)306-3159.

You are named as a joint inventor in the above identified United States patent application, filed under the provisions of 35 U.S.C. 116 (United States Code), and 37 CFR 1.47(a), Rules of Practice in Patent Cases. Sir:

The undersigned attorney has received a Decision Refusing Status Under 37 C.F.R. § 1.47(a) from the Patent and Trademark Office for the above-referenced application. The Petition to Apply for Patent Under 37 C.F.R. § 1.47(a) filed September 15, 1997, was denied due to the omission of the non-signing inventor, Norbert Marxer, on the Patent Application Declaration. The available joint

inventors, Kenneth P. Gross, Hubert Altendorfer and George Kren have executed this Supplemental Patent Application Declaration on behalf of Norbert Marxer, who has refused to sign the Declaration.

The Petition to Apply for Patent Under 37 C.F.R. § 1.47(a) is now believed to be in compliance and reconsideration and approval thereof is hereby respectfully requested.

The Petition fee in the amount of \$130.00 is enclosed. Additionally, a Petition for Extension of Time to extend the period for response for one month and the one-month extension fee of \$110.00 are also enclosed. The Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment, to Deposit Account No. 13-1030. A duplicate copy of this sheet is enclosed.

**Section 1.56 Duty to Disclose Information Material to Patentability.**

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
  - (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.
- (b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and
- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
  - (2) It refutes, or is inconsistent with, a position the applicant takes in:
    - (i) Opposing an argument of unpatentability relied on by the Office, or
    - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
  - (2) Each attorney or agent who prepares or prosecutes the application; and
  - (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.
- (d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

 :  
 : DECISION REFUSING STATUS  
 : UNDER 37 CFR 1.47(a)  
 :

This is in response to the "Petition to Apply for Patent Under 37 C.F.R.  
 § 1.47(a)," filed September 15, 1997.

The petition is dismissed.

Any request for reconsideration of this decision must be submitted within  
 TWO (2) MONTHS from the mail date of this decision. Failure to respond will  
 result in abandonment of the application. Extensions of time under 37 CFR  
 1.136(a) are permitted. The reconsideration request should include a cover  
 letter entitled "Request for Reconsideration of Petition under 37 CFR 1.47(a)"  
 and may include an oath or declaration signed by the previously non-signing  
 inventor.

The above-identified application was filed on December 20, 1996 without  
 either of an executed oath or declaration and the filing fee.

Accordingly, on February 24, 1997, a "Notice To File Missing Parts of  
 Application Filing Date Granted," was mailed, requiring an executed  
 declaration in compliance with 37 CFR 1.63 and the filing fees.

Papers on filed August 25, 1997 in response to the notice included, among  
 other things:

- (1) a Patent Application Declaration signed by joint inventors Gross,  
 Altendorfer, and Kren on behalf of themselves on Norbert Marxer;
- (2) the instant petition under 37 CFR 1.47(a) and the required fees.  
 The petition sets forth the last known address of the non-signing  
 inventor, Norbert Marxer;

Application No. 08/770,491

Page 2

(3) a declaration of facts of James Hsue providing proof that a copy of the application papers was sent to Mr. Marxer and that Mr. Marxer has refused to join in the filing of the above-identified application;

(4) a declaration of facts of Stanley Stokowski also providing proof that a copy of the application papers was sent to Mr. Marxer and that Mr. Marxer has refused to join in the filing of the above-identified application;

(5) a declaration of facts of Hubert Altendorfer also providing proof that Mr. Marxer has refused to join in the filing of the above-identified application; and

(5) a petition for a four month extension of time.

A grantable petition under 37 CFR 1.47(a) requires: (1) proof that the non-signing inventor refuses to sign the oath or declaration after having been presented with the application papers or proof that the non-signing inventor cannot be reached; (2) an acceptable oath or declaration; (3) the petition fee; and (4) a statement of the last known address of the non signing inventor(s). The instant petition lacks item (2).

As to item (2), an oath or declaration executed by the available joint inventors on behalf of the non-signing inventor in compliance with 37 CFR 1.63 and 1.64 is required. See 35 U.S.C. § 116, 37 CFR 1.47(a). The declarations do not comply with 37 CFR 1.63 and 1.64 because the residence, post office address and citizenship of the non-signing inventor has been omitted. Accordingly, a supplemental oath or declaration executed by the available inventors on behalf of Mr. Norbert Marxer (and setting forth his last known residence (city and state)), post office address (which can be a business address) and citizenship IS REQUIRED.

Dear Dr. Marxer:

We are patent counsel of KLA-Tencor Corporation. KLA Instruments and Tencor Instruments merged earlier this year, resulting in KLA-Tencor Corporation. As you may know, Tencor Instruments purchased from Censor, patent application Serial No. 08/216,834, filed March 24, 1994, in which you are named as the sole inventor. A continuation-in-part application Serial No. 08/770,491, has been filed claiming priority to Serial No. 08/216,834. In this new application, you and three other individuals are named as co-inventors and the original application Serial No. 08/216,834 is now abandoned. Enclosed is a copy of this new application for your review.

We will need to file a Patent Application Declaration for the new application Serial No. 08/770,491. Enclosed is the Patent Application Declaration and Assignment. We understand that up to now, you have refused to sign the Patent Application Declaration. The final due date for filing the Declaration is August 24, 1997. If no Declaration is filed by such date, the patent application will become abandoned. Therefore, if you have changed your mind and decide to sign the Declaration, please sign the enclosed Declaration and Assignment and return the documents to us before August 24, 1997. If we do not receive the signed Declaration by August 23, 1997, we will assume that you are still refusing to sign the Declaration. If you have any questions on this matter, please call me or my secretary Tammy Kaplan in my absence.

Sincerely,

MAJESTIC, PARSONS, SIEBERT &amp; HSUE
